

BRACELET SIZE GUIDE

METHOD 1: MEASURING WITH A PAPER SIZER

1. Print out this guide on a A4 paper, 100% to scale.
2. Check print size using a credit card.

If the width of a credit card (85.6mm)
fits in this outline,
your print scale is correct

3. Cut out the paper sizer with care.
4. Place your paper sizer around the wrist. To ensure a comfortable bracelet fit, we recommend measuring the thickest part of the wrist, usually the wrist joint.

Using with a paper sizer

5. The number indicated by the arrows is the wrist size. We recommend adding more centimeter for a loose fit.

METHOD 2: MEASURING WITH YOUR OWN

1. Using a length of string or ribbon, wrap it around the base of your wrist.
To ensure a comfortable bracelet fit, we recommend measuring the thickest part of the wrist, usually the wrist joint.
2. With a pen, mark the point on the string where the end meets.
Measure the string in cm or inches with a ruler.
3. Some people prefer to wear their bracelet tighter around their wrist, whilst others prefer it looser and nearer the back of their hand. We recommend to add more centimeter for a loose fit.
